Subject = Gate Loops

MyComment = I just wanted to drop a thanks for the great loops. Our company tried your loops 1 month ago for the first time and were very pleased from the product itself to the tech support. I was impressed with the durable outer jacket of the saw cut loops. The template kit was very helpful for the installation, especially the ones in the concrete. The time we saved on installation was huge. I had a question on splicing the loop wire and tech support had an answer and called us back under 20 Minutes. Thanks.
